Vision
Promoting practice-changing research in perioperative medicine.

Values
All of our initiatives are supported by our common values of curiosity, mentorship, excellence, innovation and collaboration.

Leadership
The PACT has a steering committee of 10 senior investigators from across Canada eager to advance perioperative research through collaboration and leadership.

Moving Forward
We will continue to strengthen this national collaborative infrastructure for advancement of anesthesia and perioperative research by:
• Identifying questions and gaps in perioperative knowledge.
• Inviting, supporting and pursuing high quality ethical research programs.
• Improving the training and mentoring of our colleagues and future colleagues.

Acknowledgement
The Perioperative Anesthesia Clinical Trials group gratefully acknowledges the financial support of the Association of Canadian University Departments of Anesthesia.

www.canadianpact.ca
The Perioperative Anesthesia Clinical Trials (PACT) Group is an inclusive, Canada-wide network of experts interested in perioperative care research. Our aim is to advance the science and practice of perioperative medicine through the development, design and implementation of the highest quality clinical research and its translation into improved health practices, products and outcomes.

What We Do

Improve patient centered perioperative care through innovative discovery, rigorous research and collaboration. To fill our mandate we:

• Conduct peer reviewed investigator initiated research
• Provide educational support and mentorship through presentation and regular review of relevant topics to members and peer review of all manuscripts and protocols
• Provide collegial collaboration and partnership with our members, our funders and other similar research groups

Membership

PACT membership is open to investigators – at all stages of their careers – with an interest in perioperative research.

Benefits of Membership

• Research
• Mentorship
• Peer Feedback
• Support for Grant & Funding Application
• Opportunities for Study Collaboration
• Networking

To become a member visit canadianpact.ca

5-Year Milestones Achieved

• Nationally funded multicentre clinical trial
• 32 active research projects
• Over $3.7M in external funding
• 8 peer-reviewed publications

Submitting an Idea or Ongoing Research for Peer Feedback and Strategic Advice

PACT invites cutting edge ideas and research at all stages and in all areas of anesthesia and perioperative medicine including transfusion, pain, simulation, systematic reviews and pre-clinical translational research. We provide peer feedback, suggest opportunities to establish or grow the research, and review grant and funding applications. We welcome any subspecialty area of interest and researchers at all stages of their careers. Submit your research idea to: canadianpact@gmail.com.
